

Batch Adjustment

- ☒ None
- ☐ Combat
- ☐ SVA

No. of Genes to include in the table

Confounding

Variation Analysis

P-value Analysis

Number of samples in each Batch and Condition

	Batch 1	Batch 2	Batch 3	Batch 4	Batch 5
Condition Biopsy	0	0	0	5	4
Condition Cancer	11	14	0	0	15
Condition Normal	0	4	4	0	0

Measures of confounding between Batch and Condition

	Standardized Pearson Correlation Coefficient	Cramer's V
Confounding Coefficients (0=no confounding, 1=complete confounding)	0.89	0.74
